WOUND CLOSURE

Suture Needle Loopuyt's
size 1 12–pack 214 228
Cutting needle designed to help to access difficult areas to suture. Needle is 80mm long o.a.

Needle Case Stainless Aesculap
204 696
Stainless steel sliding-lid case for containment of needles during sterilisation. Dimensions 75mm x 25mm x 5mm. From Aesculap, Germany.

Suture Needle Rack
210 099
A convenient spring-action rack for holding suture needles. Manufactured from stainless steel. Length 130mm o.a.

Suture Cassette Holder
6–place 219 622
8–place 219 620
Stainless steel holder with non-slip rubber feet. Fits most cassette brands.

Suture VPL Monomend MT
Monofilament
USP Needle VPL ref Order
3-0 RC 26mm M-942-1 206 242
3-0 RB 26mm M-761-1 206 239
Monomend is the perfect mid-term synthetic absorbable monofilament suture made of glyconate. Completely absorbed between 60 and 90 days without provoking any visible tissue reaction. Excellent holding power and exceptional knot security. Monomend is violet for better visibility. Very pliable, handling like a braided suture. Retains 50% tensile strength up to 14 days. Suture length is 78cm. Supplied as 12-pack. *Full range no longer available and will be deleted as stocks exhausted.

Suture Needle Reverse Cutting 3/8
Circle (Pack of 12)

No12 214 141
XL 214 734
Reverse cutting needles are traditionally found as a swaged needle in satchet suture, as they cut through tissue easily and cleanly. We offer a No. 12 needle for use on small animals and delicate jobs such as equine extremities, and an XL (3/8” long) heavy duty needle for bovine and equine use.

SPRING-EYE SUTURE NEEDLES

The spring-eye needle (also known as the French needle) is slit from inside the eye toward the distal end of the needle. This allows you to snap the suture into place with ridges on the slit holding it in. This is a great innovation for the optically challenged! Care must be taken as it is easier for the suture to become unthreaded.
